

Family Health History - 1 record per participant							Variable Availability						
<p><i>There has been some research related to diseases/conditions that run in families with PANS. In this part of the survey we're asking you to think about all the possible things you can think of involving your family's medical history. We hope that having large scale data can help reaffirm some of the already existing research findings or identify other medical conditions that may make a family at risk for having a child or multiple children with PANS. Please do your best to include everything and anything that you think might be related when filling out this survey.</i></p>							Epi Baseline ^{long}		Epi Baseline ^{short}			Epi regular follow up	Recruit. Only
